

FOR IMMEDIATE RELEASE

TANITA INTRODUCES RADIO WIRELESS SEGMENTAL BODY COMPOSITION

Provides Unprecedented Body Composition Analysis

ARLINGTON HEIGHTS, IL (December 1, 2011) – Tanita Corporation, a global leader in precision electronic scales for over 60 years, introduces the world’s first home-use radio wireless segmental body composition analyzer. The Tanita BC-1500 Ironman® radio wireless unit is an FDA cleared platform designed to help people monitor many aspects of their body to assess and track the results of their fitness and health.

Never before has so much power and technology been placed in the hands of the consumer, up to 28 distinct body composition measurements are available on the BC-1500. This unique product not only provides full-body analysis but will also dissect the user into 5 body segments. Body fat and lean muscle tissue are provided for the trunk, left arm, right arm, left leg, and right leg. This is especially useful for anyone monitoring the balance of their conditioning or for those trying to build or rehabilitate a particular part of the body.

“The BC-1500 along with its accompanying free HealthyEdge software is the perfect tool for any athlete looking to enhance their competitive edge”, said Keith Erickson, Sales Manager, Tanita Corporation of America. “Measuring and tracking the effects of your training and diet regime allow you to make educated decisions that will improve your performance”.

Tanita’s BC-1500 Ironman® builds upon Tanita’s very successful line-up of existing professional and consumer segmental body composition products. This new analyzer is designed with ANT+ radio wireless protocol, enabling measurements to be wirelessly transmitted to a computer, Apple device or Tanita remote display. The radio wireless protocol enables ultra low power applications ideal for fitness and health monitors and offers all the benefits of digital wireless communications with much lower power consumption than other wireless protocols. This provides secure and confidential transmission of the data while also providing powerful tracking ability. The BF-1500 platform features no visible display, as readings are automatically transmitted to remote display devices. This dynamic feature - the first of its kind - will allow for private readings and is perfect for anyone who wants to keep health and fitness levels private, making the BF-1500 the ultimate choice for discretion.

The Tanita BF-1500 Ironman will be packaged with Tanita's HealthyEdge software and an ANT+ USB stick, and is currently available at www.TheCompetitiveEdge.com

Tanita Corporation of America

Tanita has been a world leader in precision scales for over 60 years, and has a strong presence in medical, education, fitness, commercial, and consumer markets. Tanita's performance, innovation and durability are trusted worldwide. Tanita's dedication to helping people enjoy healthier lives has led to the development of products that take innovative design one step further by providing added value and precision.
