in handle for easy
viewing of results***

BC-545F

SEGMENTAL BODY COMPOSITION MONITOR

The FitScan BC-545F is the perfect tool for monitoring the effectiveness of any fitness or health program. This 8 electrode Body Composition Monitor displays 20 readings; 10 whole body AND 10 segmental (arms, legs and trunk area) so you can see exactly how your body is responding to specific training and lifestyle changes. From tracking body fat and muscle mass trends, to analyzing your BMR and indicating hydration levels this Monitor helps you tailor your exercise and dietary requirements to achieve your goals. The extra large LCD provides a color coded analysis of your total and segmental body fat and muscle mass. And the retractable cord ensures the handset fits snugly into the main unit for safe storage. The BC-545F has auto recognition for up to 5 users to monitor and record their results, which are stored up to 1 year.
