

HS-302

SOLAR SCALE

No batteries to replace, ever!

Reduced cost of ownership

Helps protect the environment

Solar cell works with regular household lights

Easy to read 1.3 inch LCD display

Tanita introduced the first solar bathroom scale in 1986, and the HS-302 is the latest generation of this technology. This environmentally-conscious scale has built-in solar cells that draw power from sunlight or ordinary household light, eliminating the need to buy or recharge batteries, saving our landfills from additional battery contamination and reducing cost of ownership.

The HS-302 Solar Scale provides users with accurate weight analysis up to 330 pounds on its large digital display and new, wider platform. The scale features clean, simple lines and its white design blends with a variety of bathroom décors.

Specifications:

- ✓ Capacity: 330 lb (150 kgs)
- ✓ Weight increments: 0.2lb (0.1kg)
- ✓ Plastic platform
- ✓ Solar Powered
- ✓ Platform size: 12" x 13"
- ✓ Weight: 5.1 lb
